Spare parts may be new or reconditioned.

Service and Support

EVAS will provide general technical support to Customers in the United States to resolve problems with the system configuration. EVAS does not provide training on the use of Assistive Technology, application software or peripherals.

Service offerings may vary from product to product. What do I do if I have a problem or need warranty service?

Your Responsibilities

To receive service and support, you are responsible for complying with the following:

Prepare for the Call

Before you call for support, make sure you have followed the instructions given in the Basic Troubleshooting Script section in the EVAS Xtra Series Quick Reference Guide.

Call For Assistance

In all situations, EVAS should be the primary contact for technical support and service. EVAS' System Engineers have a broad-based knowledge of computers, application software, peripherals and access technology and their interrelationships and can use this knowledge to assist you. EVAS Toll-Free Support is available from 9 AM to 5 PM Eastern Standard Time, excluding regularly observed holidays, by calling [800-872-3827](tel:800-872-3827).

If you require support outside of EVAS' normal support hours, and the problem you are experiencing is not related to the access technology or system configuration, you may use services available from Dell by calling 800-234-1490 (or 866-876-3355 if your system was purchased with the Dell Gold Support upgrade). If the problem you are experiencing is related to access technology you must contact EVAS.

IMPORTANT: If you call Dell, and they determine that:

- the whole computer must be replaced,
- or that the hard drive must be replaced, re-formatted and/or re-loaded with software or drivers,

do not take these actions without contacting EVAS. Doing so would destroy the warranted original configuration of your system including access technology.

Please call the **individual manufacturers** for support on peripherals, such as printers and scanners.

Explain Your Problem to the System Engineer

Now you are ready to describe the problem you are having with your system.

Let the System Engineer know what error message you are getting and when it occurs, what you were doing when the problem occurred, and what steps you may have already taken to solve the problem.

Cooperate with the System Engineer

Experience shows that most system problems and errors can be corrected over the phone, as a result of close cooperation between the user and the System Engineer. Listen carefully to the System Engineer and follow the System Engineer's directions.

IMPORTANT: If you call Dell, and they determine that:

- the whole computer must be replaced,
- or that the hard drive must be replaced, re-formatted and/or re-loaded with software or drivers,

do not take these actions without contacting EVAS. Doing so would destroy the warranted original configuration of your system including access technology.

If the System Engineer is unable to resolve the problem over the phone and determines that On-Site Service is required, the terms of Dell's Type 3 Service Agreement apply. Your EVAS Xtra Series Dell Customized Computer comes standard with Dell's Next-Business-Day Replacement Service. If you follow the procedures outlined by the System Engineer, a service technician will, in most cases, be dispatched to arrive at your location for On-Site Service on the next business day, Monday through Friday 8 AM to 6 PM, excluding regularly observed holidays. If the service technician is dispatched for On-Site Service after 5 PM local time, the service technician may take an additional business day to arrive at your location. Scheduling of the arrival of the service technician may also be determined by the availability of repair or service parts.

UNTIL YOU HAVE COMPLIED WITH THE PRECEDING PROCEDURES, EVAS CANNOT DISPATCH A SERVICE SYSTEM ENGINEER TO PERFORM ON-SITE REPAIRS.

The hours of Support shall not include regular holidays that include New Year's Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas Day, and the day after Thanksgiving and Christmas Day. EVAS is not liable for any failure or delay in performance due to any cause beyond their control. In any event, if EVAS' ability to render support services is impaired by circumstances beyond EVAS' control, EVAS may terminate this Contract; in any event, you will receive a refund for any unused portion of your service term for which you had paid.

Shipping

If the System Engineer is unable to resolve the problem over the phone and determines that Mail-In or Ship Back Service is necessary, the following Standard procedures apply. EVAS regrets that it cannot accept systems that are not returned in accordance with these shipping instructions:

1. **Software/Data Backup.** You understand and agree that EVAS and Dell are not responsible for any loss of software or data. It is the user's responsibility to maintain an up-to-date backup of their system, especially important user data, such as files and documents that can't be easily reconstructed. When the system is returned to you, make sure you scan these data files for viruses before restoring them to your system.
 2. **Display the Return Authorization Number.** Please print the authorization number you obtain from the System Engineer or Customer Service Representative clearly and conspicuously on the outside of the packaging. Unfortunately, EVAS or Dell may refuse delivery of the system or may refuse to service the computer, and may return to you, any system that does not clearly and conspicuously display the authorization number on the packaging.
 3. **Explain the Problem in Writing.** Please enclose a brief description of the problem encountered, the error message received, and the suspected defect you discussed with the System Engineer over the phone as well as your return shipping address.
 4. **Shipping.** Following the problem diagnosis the EVAS System Engineer will transfer you to an EVAS Customer Service Representative, explain the situation to the representative and turn any further shipping actions over
-

to the Customer Service Department, who will determine the responsibility and procedures for shipping. The system must be shipped in the original or equivalent packaging to the address given to you by the EVAS Customer Service Representative.

5. **Package Your System.** You will be responsible for ensuring that the system is properly packaged and you will bear the full risk of loss or damage for any System that is returned improperly packaged.
6. **Other Shipping Precautions.** Do not send your manuals or any non-Dell or non-EVAS supplied products with your system. Prior to shipping, you must remove the options and components from your system as instructed by the System Engineer.
7. **If You Miss The Carrier Visit:** If you or your authorized representative is not at the location when the carrier arrives, he or she will leave a delivery attempt notice and will attempt redelivery. If you and the carrier are unable to coordinate the pickup, you will need to call EVAS and schedule another carrier visit and you may be subject to an additional charge.

How will you fix my product?

EVAS and Dell use new and refurbished parts made by various manufacturers in performing warranty repairs and in building replacement parts and systems. Refurbished parts and systems are parts or systems that have been returned to Dell, some of which were never used by a customer. All parts and systems are inspected and tested for quality. Replacement parts and systems are covered for the remaining period of the limited warranty for the product. Dell owns all parts removed from repaired products.

Data recovery is not included in warranty service and EVAS and Dell are not responsible for data that may be lost or damaged during transit or a repair.

Customer Replaceable Units and Whole Unit Replacement

If the Dell Telephone Technician or EVAS System Engineer determines that the defective unit is one that is easily disconnected and reconnected, such as a

keyboard, monitor, or any other component designated from time to time as a component that may be replaced by the customer, you may be sent such component to install without a service technician arriving on site. Also, if the Technician or System Engineer determines that the system is one that should be replaced as a whole unit, a whole replacement unit with a prepaid return mailing label for the defective return may be sent directly to you (see note below). If a service technician delivers the replacement unit to you in person, you must relinquish the defective unit to the service technician. If you do not relinquish the defective unit to the service technician as required above, or if, in the event the replacement unit was not delivered in person by a service technician, and if the defective unit is not returned within ten (10) days, you agree to pay EVAS for the replacement unit upon receipt of invoice. Failure to honor the invoice within ten (10) days after receipt will cause the cancellation of this Agreement and may result in other legal steps.

IMPORTANT: If you call Dell, and they determine that:

- the whole computer must be replaced,
- or that the hard drive must be replaced, re-formatted and/or re-loaded with software or drivers,

do not take these actions without contacting EVAS. Doing so would destroy the warranted original configuration of your system including access technology.

Parts Ownership

All service parts removed from your system become the property of Dell. You will be obligated to pay, at the current retail price(s), for any service parts removed from your system and retained by you. EVAS and Dell use new and reconditioned parts made by various manufacturers in performing warranty repairs.

Parts Stocked

Dell, based on its experience, has stocked parts in various locations throughout the United States. Selected parts may not be stocked in the location closest to your site. If a part that is needed to repair your system has to come from another

location, it will be shipped using overnight delivery.

Term and Renewal

Prior to the expiration of your service contract, you may upgrade your service level or extend your service period based on available options then in effect. Any upgrades will not apply to conditions pre-existing the effective date of the upgrade. Please contact EVAS Customer Service at 800-872-3827 to discuss extending or upgrading this Agreement.

Claims of Confidentiality or Proprietary Rights

You agree that any information or data disclosed or sent to EVAS or Dell, over the telephone, electronically, on the systems storage devices, or otherwise, is not confidential or proprietary to you.

Cancellation

You may cancel this Agreement by providing EVAS at least thirty (30) days written notice of your decision to cancel. EVAS will issue a refund to you for any unused portion of the service term for which you have paid. If more than thirty (30) days have transpired for the current contract year, then a refund will not be paid for that current contract year.

Transfer of this Agreement

Subject to the limitations set forth in this Agreement, you may transfer this Agreement to anyone who buys your entire system before the Termination Date of this Agreement, provided you are the original purchaser of the system

and this Agreement, or you have purchased the system and this Agreement from its original owner or a previous transferee and have complied with all the transfer rules in this Agreement. Please note that if you move your system to a geographic location in which the service coverage is not available at the same price as you paid for this Agreement, you may incur an additional charge to maintain the same categories of service coverage at the new location. If you choose not to pay such additional charge, your service may be automatically changed to categories of service that is available at such price or a lesser price in such new location with no refund available. Additionally, if you transfer your Agreement to a buyer who will move the System to a geographic location in which the service coverage is not available at the same price as you paid for this Agreement, or, if the transferee or buyer of this Agreement wishes to change the service coverage, then you may incur an additional charge for such transfer fee discussed above.

To Transfer The Dell Service Agreement

Please call EVAS for assistance in transferring the Dell Service Agreement at 800-872-3827.
